Profile Summary

An experienced Fullstack Java Developer with around 5+ years of experience in the IT industry, specializing in domains such as Insurance, Health care and Retail. I have collaborated with clients to develop software applications utilizing a modern technology stack.

EXPERIENCE

Fullstack Java Developer, NielsenIQ | Chennai

Mar, 2025 - Present

- Working as a Java Full Stack Engineer, handling both frontend and backend tasks.
- Responsible for Angular enhancements, UI improvements, and bug fixing.
- Implementing and updating business logic using Spring Boot based on functional requirements.
- Fixing backend issues and ensuring smooth integration between frontend and backend.
- Addressing Cyscale issues related to security and code quality.
- Supporting code reviews, testing, and deployment activities.
- Ensuring overall application performance, stability, and maintainability.
- Developing and maintaining UI automation tests using Playwright to ensure consistent quality across user interfaces and streamline regression testing.

Java Backend Engineer, Accenture | Hyderabad

Sep, 2021 - Feb, 2025

- Developed backend services using Java, Spring Boot, Microservices, and NoSQL; created secure REST APIs with AES encryption.
- Worked on both backend and frontend (Angular, TypeScript) features, ensuring performance and quality through unit testing and bug fixing.
- Collaborated in Agile teams, actively participating in sprint planning, client meetings, and retrospectives.
- Built efficient, maintainable code and contributed to performance improvements across the application.
- Strong in problem-solving, front-end fundamentals (HTML5, CSS3, SQL), and cross-functional team collaboration.

SKILLS

Core skills Java, Spring boot, Spring security, Spring Data JPA, RabbitMQ, Microservices, Angular, HTML5, CSS3, Bootstrap, JavaScript, JUnit, Mockito, SQL, NoSQL, Playwright
Problem-Solving Data Structures, Algorithms, OOPs
Others Jira, Git, GitHub Copilot, Postman, Swagger, OpenAPI and Agile Methodologies

ACHIEVEMENTS

Client Centric Leadership Award

Accenture

EDUCATION

Sree Vidyanikethan Engineering College

B.Tech, Information Technology

Tirupati, IN

2017 - 2021

PROJECTS

AIG (American International Group, Inc.)

- Developed a scalable backend using Java, Spring Boot, Microservices, and NoSQL for an IVR system.
- Integrated RESTful APIs to handle caller inputs and backend workflows seamlessly.
- Designed call flow logic and managed database operations for efficient data handling.
- Ensured smooth integration with external systems like CRM platforms and telephony services.
- Documented APIs using Swagger and implemented secure authentication and authorization protocols.
